PROFESSIONAL SUMMARY

Full-Stack Developer with 2+ years of freelance experience shipping production-ready web applications across e-commerce, real estate, and SaaS. Proficient in the MERN stack and Next.js, with a strong eye for design and a track record of delivering complete, client-ready products independently.

TECHNICAL SKILLS

Frontend: React.js, Next.js 14, TypeScript, JavaScript (ES6+), Tailwind CSS, Redux Toolkit, Framer Motion, Recharts

Backend: Node.js, Express.js, REST APIs, NextAuth, JWT, Google OAuth 2.0, Bcrypt

Database: MongoDB, Mongoose, Firebase

DevOps & Tools: Git, GitHub, Vercel, Railway, Netlify, VPS Deployment (Hostinger), Cloudinary, Postman

EXPERIENCE

Software Engineer Intern • Matrix Credit Risk Controls Pvt. Ltd. | Jun 2025 – Jul 2025 | *Delhi, India (On-site)*

- Built a Contact Point Verification System to validate, manage, and authenticate user touchpoints across platforms using React and Node.js.
- Developed and debugged production features involving Chrome extensions and third-party API integrations.
- Maintained clean version control workflows across the team using Git and GitHub.

Full-Stack Developer • Freelance | 2024 – Present | *Remote*

- Independently designed, developed, and deployed full-stack web applications for clients in SAAS, real estate, and e-commerce, handling everything from DB schema to UI.
- Built and shipped multiple live production projects using the MERN stack, Next.js, and Tailwind CSS with custom CMS integrations, payment gateways, and cloud media pipelines.
- Managed end-to-end client relationships — requirements gathering, iterative delivery, and post-launch support.

EDUCATION

Master of Computer Applications (MCA) — IITM Janakpuri, Delhi 2024 – 2026

Bachelor of Computer Applications (BCA) — IGNOU 2020 – 2023

PROJECTS

Ledger.AI — Personal Finance Tracker — *Next.js 14, MongoDB, Gemini API, Recharts, react-pdf, Tailwind CSS*

- Built a full-stack AI-powered SaaS that parses PDF bank statements using pdf-parse, then uses Gemini 2.5 API to extract and auto-categorize transactions with zero manual input.
- Developed an AI financial coach chat interface that answers spending questions using the user's live transaction history as context.

- Engineered interactive monthly reports with MoM comparison charts (Recharts) and client-side PDF export (react-pdf).

HardWear — Full-Stack E-Commerce Platform — *Node.js, Express, MongoDB, React, Tailwind CSS, Razorpay, Cloudinary, Resend API, Google OAuth*

- Developed a production-ready e-commerce platform with a dynamic storefront, admin dashboard, and full order lifecycle management.
- Integrated Razorpay Standard Checkout with HMAC-SHA256 signature verification, automating stock deduction and transactional invoice emails via Resend API on payment confirmation.
- Architected a secure auth system combining Google OAuth 2.0 and Two-Step Email OTP Verification backed by MongoDB TTL indexes for token expiry.
- Built an Admin Analytics Dashboard surfacing real-time revenue, active users, order fulfillment status, and automatic low-stock alerts.
- Designed an optimized image pipeline using Multer and Cloudinary for cloud-based storage, CDN delivery, and thumbnail generation.

RagviDesign — Interior Design Company Website — *MERN Stack, Tailwind CSS*

- Designed and developed a fully responsive website with a custom-built CMS, enabling the client to manage portfolio entries, services, and site content independently no developer dependency post-launch.
